EMPLOYMENT HISTORY

April 2011 - Present

Lelander

St. Louis, MO

Interface Engineer, Multimedia Developer, Web & Mobile Designer

- Hand-Code HTML, CSS, and Javascript for websites based on PSD, PNG, and Illustrator layouts. Websites use Coldfusion for their back-end.
- Work alongside and lead teams of developers to create websites and applications for desktop, tablet, and mobile devices. The best practices of MVC, SVN, and GIT are used for these larger group projects.
- Produce online apps and websites using full Javascript stack including AngularJS, BackboneJS, MongoDB, ExpressJS, and Node.
- Design UI for mobile applications, responsive CSS sites, and desktop websites.
- Integrate third party API and libraries into websites and applications.
- Create flash banners, animations, and applications using actionscript.
- Test sites across all major browsers, their versions, operation systems, and mobile devices.
- Research and implement Organic Search Engine Optimization (SEO).
- Handle video requests including editing, effects, and encoding.

March 2011 - September 2011

FloodLight Design

Chicago, IL

Interface Engineer

- Hand-Code HTML, CSS, and Javascript for websites based on PSD layouts. Websites use Wordpress or Joomla for their back-end.
- Test sites across all major browsers, their versions, and operation systems.

May 2010 - June 2011

Imagery Marketing Group

St. Louis, MO

Interface Engineer & Multimedia Developer

- Hand-Code HTML, CSS, and Javascript for all websites based on PSD layouts. Websites use a LAMP (Linux, Apache, MySQL, PHP) stack for their back-end.
- Research and implement Organic Search Engine Optimization (SEO), Pay Per Click and Adwords.
- Create Rich Internet Applications (RIA) using Flash or JQuery.
- Keep current with the latest web design and development trends.
- Incorporate third party tools for social media, email marketing, and Google Analytics.
- Test sites across all major browsers, their versions, and operation systems.

- Build HTML and simple text email campaigns.
- Handle video requests including editing, effects, and encoding.
- Maintain and update current client sites.

December 2006 – May 2010

Insite Advice

St. Louis, MO

Interface Engineer & Multimedia Developer

- Hand-Code HTML, CSS, and Javascript for all websites based on PNG layouts. Majority of websites used Ruby on Rails as their back-end while others used PHP or ASP.
- Create flash animations or flash applications requiring actionscript programming.
- Test sites across all major browsers, their versions, operation systems, and mobile devices.
- Handle all video requests including editing, effects, and encoding.
- Research and implement Search Engine Optimization (SEO), Pay Per Click and Adwords.
- Style sites to incorporate Insite's copyrighted CMS as well as third party CMS such as Joomla and Wordpress.
- Work with clients and manage projects to ensure sites launch on time and on budget.
- Perform maintenance and updates for current live sites.

EDUCATION

Savannah College of Art and Design

2002

Savannah, Georgia

- B.F.A., Video/Film
